

GlasStile S

Motorized ADA Compliant Entrance Gate

Originally designed to comply with the Americans with Disabilities Act of 1990 and address a missing link in the entrance control marketplace, the GlasStile S gate can now be found in many different settings with multiple applications. Not just your run-of-the-mill gate, the GlasStile S is supported by a microprocessor, allowing it to be completely integrated within any access control system while keeping potential intruders in check.

The GlasStile S can interface with any card reader, remote control, emergency pushbutton, or other access control system to provide secured access through the gate. Designed to automatically open under power failure or fire alarm emergency, the GlasStile S is a perfect solution when authorized ADA access or service cart entry is required.

When installed in proximity to existing entrance turnstiles, the GlasStile S can replace the need for expensive additional ADA compliant turnstiles. And when space is limited, the GlasStile S may be a perfect fit, providing the required ADA option where conventional optical or mechanical turnstiles may be too large. Where a wider service entrance is required, GlasStile S gates can also be configured as a tandem pair.

Gunnebo offers custom housing materials such as stainless steel, brass, and muntz, and aesthetic details like logo etching and frosted glass panels. With its small footprint and custom glass sizes and materials, the GlasStile S can be tailored to suit any application.

GlasStile S

Motorized ADA Compliant Entrance Gate

TECHNICAL SPECIFICATIONS

Orientation	Pass Left or Pass Right	
Unit Dimensions	Column Height	37.4" or 39.4"
	Column Diameter Width	8.7"
	Standard Glass Barrier Height*	35.4" (for 37.4" columns) or 37.4" (for 39.4" columns)
	Standard Glass Barrier Width*	37.4"
	Standard Walkway Width*	39.4"
	<i>* can be customized to site requirements</i>	
Drive	Motorized	
Materials	Rotor Column	8.7" diameter #4 horizontal grained or polished stainless steel (other materials available on request)
	Rotor Wing	0.39" thick tempered glass panel
Interface	Potential free contact provided by either a cardreader or pushbutton input. Cardreader <i>Inhibit</i> and <i>Reset</i> output signals available as standard.	
Function	Passage in both directions, electronically controllable.	
Operation	On receiving a signal from the access control system, the unit will unlock and drive through 90° away from the direction of the user.	
Fire Alarm	Input facility, for voltage-free contact supplied by others to effect fail state.	
Power Supply	110VAC 60Hz (50Hz available). The circuit is fed via step-down transformer supplied with the unit.	
Power Rating	80 VA per walkway; 1.8AMP at max usage.	
Logic Voltage	24VDC	
Flow Rates / Throughput	<p><i>Please note these figures are approximate and must be confirmed with Gunnebo Entrance Control Inc. Figures quoted are for one person per complete passage per walkway, per minute. It is assumed the access control authorization response is instantaneous. Flow rates will increase with multiple passage use.</i></p> <p>30 single users per minute (dependent on access control system used).</p>

ACCESSORIES & DESIGN OPTIONS

Alternative Materials, Finishes, and Custom Design

- Refer to Gunnebo Entrance Control Inc. for specific material design requirements
- Alternative rotor cladding and casework materials
- Custom glass barrier dimensions or smaller panels for tandem operations
- Custom logos and etching on glass panels

Card Reader Options

- Refer to Gunnebo Entrance Control Inc. for feasibility
- Cardreader pedestals available
- Proximity, magnetic stripe, biometric or barcode readers all compatible

Remote Lane Control

- Simple console to control the GlasStile S rotor release
- Remote console to specific requirements
- Pushbutton pedestal available

Alternative Mounting

Specialized mounting base platforms giving concealed cableway and requiring no drilling, trenching, or core drilling to the floor.

Infill Panels

Where extra space presents in a design, integrated or standalone space infill solutions can be provided.

Pushbar

Affixed to the top of the glass wing to match casework choice.

Example of the bronze-finished GlasStile S configured as a tandem pair.
