

# Gunnebo SpeedStile FLs DS

Slim Profile Speed Gate with Swinging Glass Barrier | Designer Series

**GUNNEBO®**

## Technical Specifications

Standard Dimensions	Casework Length	70.9"	Walkway Width	28.0" std / 36.0" ada
	Casework Height	37.3"	Casework Width	7.3" end unit / 9.8" center unit
	Glass Barrier Height	33.6" / 47.2" / 59.1" / 70.9"		
Orientation, Drive	Bi-Directional, Motorized			
Materials	Pedestal* Pedestal Lid* Barrier	#4 grade stainless steel and 0.4" thick tempered glass inlay Technopolymer painted gray 0.4" thick tempered glass		
Drive Mechanism	The moving panels are directly mounted to the output shaft of a DC electric motor and gearbox. The motor and gearbox assembly is mounted vertically in the central column. The moving panel position is monitored by a rotary encoder and the location, speed, and movement are controlled by microprocessor control system. The opening and closing speeds, home, and end positions are adjustable within the controller. Safety photocells prevent the panels from closing on an obstruction. Should the normal panel operation encounter an obstruction, the controlling logic detects an abnormal condition and stops the panels from moving.			
Function	Passage in both directions is electronically controlled. Default mode is Normally Closed (NC), and lane will open only upon acceptance of an authorized signal.			
Flow Rates	Up to 60 users per minute (approximate figures).			
Operation	On receiving a signal from the access control sytem or pushbutton, the panels open. If an unauthorized person tries to tailgate or enter from the opposite direction, the system detects the unauthorized passage and activates the built-in alarm system.			
Fire Alarm	Input facility, for voltage-free contact supplied by others to effect fail state.			
Power Supply	115VAC 60HZ (230VAC 50HZ available)			
Power Rating	Stand By 20VA / In Operation 120VA			
Logic Voltage	24VAC			
Power Loss	In a loss of power the barrier glass will be completely de-energized and move freely with very minimal force to the open position.			
Certification	UL 2593; Outline for motor-driven turnstile operators and systems.			

\*As standard. See Accessories and Options for alternatives.

## Operational Modes & Notifications

### Interface

Potential free contact provided by either card reader or pushbutton input. Card reader inhibit and reset signals are available as standard. The unit has an adjustable time out facility if required; the go ahead symbol will be cancelled if the passage through the lane is not completed within a pre-set and field programmable time frame.

### Operational Modes

#### Full-Time Barrier (Normally Closed Mode)

The swinging panels remain closed until a valid access control card is presented. Tailgaters and unauthorized entries are signaled by an alarm-type tone. If an unauthorized card is presented, the lane will sound an alarm and the panels will remain closed to prevent the user from proceeding further without intervention.

#### Standard Operating Modes

Switchable via optional pushbutton (DTC) or touchscreen (MP Touch) controller.

Enter/Card In	Reset
Exit/Card Out	Close
Free Exit/Card Out	

### Pictogram Lights

LED display pictograms visually assist the user when passing through the unit. Included as standard.

## Accessories & Options

**Alternative Lid Materials and Finishes** A variety of RAL painted colors and finishes are available in addition to the standard gray painted lid.

**Card Reader Options** Custom integration of customer-supplied readers into pedestal lid. Maximum flush-mounted card reader size on lid is 9.8" x 3.3" x 1.2". Bar code scanners mounted to front end leg.

**Remote Lane Control** Remote lane control via tablet or smartphone with Gunnebo EntraLinq; desktop pushbutton controller (DTC) or touchscreen controller (MP Touch) also available.

**Alternative Mounting** Specialized mounting base platforms giving concealed cableway and requiring no drilling, trenching, or core drilling to the floor.

**Static Panels** When extra space presents in a design, integrated or standalone barrier solutions can be provided.

**Elevator Destination Dispatch** Mounting integration of customer-supplied LCD screens for elevator destination dispatch systems.
